DETAILED ACTION

This Office action is in response to applicant's amendment filed on 12 January 2006, which has been entered.

Allowable Subject Matter

1. Claims 1, 3-14, 17 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - Claims 1, 17 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method of forming a layer in a selected area on a wafer in a single growth step that includes the steps of growing a layer with a thickness that is greater in a selective area growth region than it is elsewhere on the wafer and etching the layer to leave a thickness of the layer in the selective area growth region while removing the layer from elsewhere on the wafer, wherein the growth step is a metalorganic epitaxial CVD method;
 - Claims 3-14 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method of integrating

optical devices on a wafer that includes the steps of growing an optical device layer with a thickness that is greater in a selective area growth region than it is in an adjacent planar region and etching the optical device layer to leave a thickness of the optical device layer in the selective area growth region while removing the optical device layer from the adjacent planar region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
